

Payment & Collection Kiosk

designed to fit

Overview

Payment Kiosk is a targeted kiosk solution for any company which provides payment services (such as prepaid top-up, bill payment services and etc.) to a variety of customers through different channels.

Kiosk iNNOVA's payment kiosk terminal allows you to provide bill payment services to your customers enabling them to use banknotes, credit/debit cards or coins. For cash transactions, the kiosk supports bank notes and coins, validates them and any excess amount is returned back by either using coin or banknote dispenser.

The bill payment kiosk is designed with built-in security, flexibility and serviceability to meet your current and future business needs. We provide a fullest turnkey solution which covers all the hardware and software needs. Strong relationships with third-payers enable us to provide the required payment processing and banking and cash management services.

A Rich Set of System Features

Postpaid

- Bill payment
- Partial payment
- Advance payment

Prepaid

- Topup
- Voucher sale

Other payments

- Tax payments
- Insurance payments
- Currency exchange

Benefits

Recycling Unit

Ki Payment Kiosk's cash-recycling device for note acceptance and payout in one single unit. This modular unit allows four different type of notes to be stored for recycling. In the market for note payout Ki Payment Kiosk offers a unique advantage. With the loader feature up to 300 notes can be stored for recycling, thus avoiding note starvation, a major potential shortcoming in this market. The total number of notes that can be recycled is 460 with a cashbox that can hold up to 600 notes.
